GameStory:

With the development of science and technology at the end of the 22nd century, human beings were divided into three factions which called [U.N.N],[MARS] and [O.P.A.S], spanned all the reaches of the solar system.

---

Large number of population brought a result of resource depletion.Environment became worse day by day,even with a situation that people had to buy fresh air according to their credit rating.Conflicts of all sizes occur all over the solar system in every minutes .

Under the resource depletion of the earth, [U.N.N] started to gain resources from the solar system by all means.However, [MARS] and [O.P.A.S] couldn't endure all kinds of shameless actions any more, and they started a war against [U.N.N].The war among three factions consumed almost all the exploitable planetary resources in the solar system.

At the mean time, a mysterious signal from the edge of the solar system attracted the three factions. A mysterious giant relic was found near the signal.While facing this unknown threat, three factions signed an armistice agreement and send their elites to explore this relic.

The relic was activated by some kind of power when the scientific spacecrafts reached the relic.It opened hundred of wormholes to unknown universe. People became ecstatic and thought this was a gift from civilizations of a higher level.

They organized spontaneously, prepared to pass the wormholes.

However, the relic was destroyed by excessive power when people were full with hope. Wormholes collapsed one by one,same as some of those spacecrafts which were acrossing.

Under the interference of excessive energy and the unstable wormhole,the rest of spacecrafts were brought into a new universe.This universe was empty, only a dazzling yellow star, some gas planets, and asteroids scattered everywhere.

Their spacecraft was to be disintegrated.

There is no way back. They can only rebuild human civilization in this universe.
